THE COMMUNITY EMERGENCY PLAN

1 Introduction

- 1.1 An emergency/major incident is any event or circumstance (happening with or without warning) that causes or threatens death or injury, disruption to the community, or damage to property or to the environment on such a scale that the effect cannot be dealt with by the emergency services, local authorities, and other organisations as part of their normal day-to-day activities.
- 1.2

Although there is no statutory responsibility for communities to plan for, respond to, or recover from emergencies, it is good practice to identify hazards and make simple plans on how they could respond to them.

1.3

This plan has been developed to provide resilience for the community in the pre-event phase or early stages of an emergency.

All major emergencies are dealt with by the Emergency Services, Local Authorities, Utilities and Voluntary Agencies in a combined response. In extreme conditions such as heavy snow and flooding, there is a possibility that the emergency services may not be able to reach the scene immediately.

In such circumstances, the initial response may rely entirely on local people.

This Community Emergency Plan will help our community prepare for an emergency and minimise its impact should they be affected.

- 1.4 Communities have access to people or resources that allow them to respond to specific incidents that may affect a particular locality. Details of the role these people may play and how they will be contacted are included in our Community Emergency Plan.

2 Aim

- 2.1 The aim of this plan is to increase resilience within our community through developing a robust, co-ordinated approach that compliments the plans of responding agencies.

Objectives

- Identify the risks most likely to impact the community

- Identify relevant steps to mitigate and respond to emergency situations, including warning the community as required.
 - Identify vulnerable people / groups / establishments in the community
 - Identify community resources available to assist during an emergency
- 2.3
- Provide key contact details for the Community Response Team, Key Community Resources, the Emergency Services and Local Authorities.
 - Provide information and assistance to the Emergency Services upon their arrival and as appropriate throughout the event.

Review of the Plan

This plan will be reviewed and exercised annually.

3. Activating the Community Emergency Plan

3.1 When an emergency is anticipated, or occurs, the cascade call out list as at Appendix 3 is to be activated. The lead individual will identify the most appropriate location to base the emergency co-ordination point. Potential locations are identified at Appendix 2

3.2 Once the co-ordination centre has been identified, the statutory services will be informed in order they may establish their own command posts as required.

The Plan activation check list is attached at Appendix 4

3.3 All information, actions and decisions will be recorded on the incident record sheets as shown at Appendix 5. These records will be retained as required.

Emergency Incidents

3.5 Emergency incidents can take many forms, this plan has identified the most likely incidents to affect Roche and those are attached as appendices. The list is not exhaustive and will be reviewed as part of the annual process, particularly in the light of any developments in and around the parish.

The plan has also considered those emergency and contingency plans held by Cornwall Council. Those are referred to at Appendix 2

ACTIVATING THE COMMUNITY EMERGENCY PLAN (Appendix 4)

5 Notification of an emergency

- 5.1 Notification of an emergency may come from various routes, from the emergency services, local authority, and local media or from the community itself. This plan shows the procedure in place to record details of any incident and activate this emergency plan.
- 5.2 Whenever an emergency is brought to the attention of the community, the plan will be activated by one of the plan co-ordinators, highlighted below. Full activation may not be required but the co-ordinator will record information and decisions on the Incident Record Sheet. It may be necessary to inform other agencies, contact details are as shown at Appendix 3

6 Coordinators

- 6.1 On receiving notification of an incident or major emergency affecting the community, the Emergency Coordinator should contact those people identified to help respond.

The following people have been identified to co-ordinate the local response:

NAME	TELEPHONE NUMBER	MOBILE NUMBER
John Wood	01726 891393	07817 420701

Sample Telephone Tree

The phone tree works as a pyramid, with the coordinator at the top making the first call to two or more people. In turn, they call an assigned set of people and so on, until the tree is complete.

Remember should the next person on the cascade not answer carry on down the tree until enough people are informed to assist.
